Fuel surcharge (FSC) % is calculated weekly based on prices issued by the DOE's Energy Information Administration website, National Energy Information Center (202-586-6966) or <http://www.eia.gov/petroleum/gasdiesel/> under the U.S. On-Highway Diesel Fuel Prices* (dollars per gallon) section specifically for the California Index. The FSC will be effective on the port termination/return date for the same week the diesel fuel prices are issued by the DOE. Example: Fuel index issued on Monday, FSC effective on the same day for containers terminated Monday to Sunday of the issue week.
